SUMMARY

Data Science MSc graduate with experience in analytics, machine learning, and website performance monitoring.

TECHNICAL SKILLS

Data analysis and BI: Python, SQL, PostgreSQL, Excel (Advanced), Power BI, Tableau, Metabase, Pandas, NumPy

Data engineering: ETL pipelines, data cleaning, data quality validation, source-to-target mapping, SQLAlchemy, MongoDB, GCP storage

Machine learning: TensorFlow, Keras, Scikit-learn, CNNs, RNNs, VADER NLP, feature engineering, model evaluation, OpenCV

Web and analytics: HTML, CSS, Google Analytics, Google Search Console; digital marketing and SEO fundamentals (ongoing learning)

Development and visualization: Git, GitHub, Jupyter, Streamlit, Matplotlib, Seaborn, Plotly

PROFESSIONAL EXPERIENCE

Digital & Systems Support

2026 - Present

FoxWud - Sharjah, UAE

- Designed and developed the company website, organizing service, project, and business content into a consistent information structure.
- Monitor website statistics in Google Analytics and search performance in Google Search Console to track the company's online presence.
- Study digital marketing and search engine optimization (SEO) to support ongoing website development and online visibility.
- Created a centralized document and data organization system using standardized folders, naming conventions, and categories to improve information retrieval.
- Reviewed manual workflows and identified opportunities for reporting, document automation, and future AI-assisted knowledge retrieval.

Data Analyst Consultant - Freelance

Mar 2026 - Jun 2026

Optical Store - United Arab Emirates

- Designed and implemented an end-to-end ETL pipeline using Python and PostgreSQL, processing 110,639+ transaction records from ERP exports across 14 branches.
- Defined source-to-target mappings from ERP CSV exports to a PostgreSQL schema, including transformation and data cleansing rules across 27 fields.
- Standardized 12,314+ unique product descriptions and consolidated 30+ payment method variations into 8 types through automated cleaning scripts.
- Built a Metabase dashboard with multi-level drill-down analysis by branch, brand, and payment method across 14 locations.

AI & ML Engineering Intern

Jul 2025 - Feb 2026

Aura Health Technologies - Berlin, Germany

- Structured and maintained data repositories containing 500,000+ image frames to support reliable machine learning workflows.
- Profiled and validated large datasets, identifying and resolving inconsistencies to improve data quality.
- Researched and implemented CNN architecture improvements that reduced model inference time by 15 seconds.
- Used Google Cloud Platform (GCP) storage and MongoDB to manage medical datasets, with Git supporting version control and collaboration.
- Collaborated with cross-functional teams to translate research requirements into structured data deliverables.

PROFESSIONAL EXPERIENCE CONTINUED

IT Intern

Jul 2022 - Sep 2022

Hirsch Bedner Associates (HBA) - Dubai, UAE

- Tracked and analyzed IT issues in Excel, maintaining a structured database of issues.
- Generated reports from IT issue records to support system performance monitoring.

EDUCATION

MSc in Data Science, AI and Digital Business

Sep 2023 - Sep 2025

GISMA University of Applied Sciences

Berlin, Germany

BSc in Information, Systematics and Management

Oct 2020 - Jun 2023

Manipal University of Higher Studies

Dubai, UAE

PROJECTS

Hindi Handwritten Vowel Recognizer

[GitHub](#)

Python, TensorFlow/Keras, OpenCV, Streamlit

- Collected and labeled 1,260 handwritten Devanagari vowel images, using thresholding, resizing, and noise removal to prepare consistent training inputs.
- Designed and trained a custom CNN from scratch, achieving approximately 87% validation accuracy; deployed an interactive Streamlit demo for real-time predictions.
- Diagnosed and resolved positional bias and stroke-width differences between training images and live hand-drawn input.
- Evaluated a data augmentation experiment, reversed it after validation accuracy declined, and documented the trade-offs.

Customer Sentiment Analysis

[GitHub](#)

Python, VADER NLP, Matplotlib, Seaborn

- Cleaned and preprocessed customer review text, then applied VADER sentiment analysis to identify satisfaction patterns.
- Created visualizations of sentiment trends over time and across product categories to support customer experience decisions.

Data Modeling for Retail Insights

[GitHub](#)

Python, Pandas, Power BI, Tableau

- Cleaned, transformed, and aggregated multi-table retail data with Pandas to create structured, analysis-ready data models.
- Built interactive visualizations of product placement and sales performance to communicate findings to stakeholders.

Stock Price Prediction with Deep Learning

[GitHub](#)

Python, TensorFlow, RNN

- Engineered time-series features from historical stock prices and built an RNN, preparing normalized sequences and train/test splits.
- Evaluated model performance using time-series validation techniques designed to avoid lookahead bias.

ADDITIONAL INFORMATION

Languages: English - Full Professional Proficiency; Hindi - Native; German - Elementary (A2)

Certifications: TensorFlow for Deep Learning Bootcamp; Complete Data Analyst Bootcamp - Basics to Advanced; Natural Language Processing (NLP) in Python

Awards and activities: Best Research Award (2021); Cultural Secretary of the Science Department during bachelor's studies; event management volunteering
